

MEDIA FX DIGITAL SIGNAGE PLAYER

MEDIA FX PLAYER

- Pair with an off-the-shelf LCD/LED commercial grade screen of any size
- Fully networked, managed connectivity
- Wireless or Ethernet networking options
- Usage/Availability tracking and reporting
- Manage content remotely, off-site, using an 'in the cloud' content management system
- Mounts behind the screen using a standard VESA mount
- Lightweight and small (210mm x 100mm x 30mm)
- Connects to the screen via a standard HDMI cable

Introducing, MEDIA FX...

MEDIA FX is an ethernet or Wi-Fi enabled commercial digital signage media player that is considered to be a 'best of breed' industry standard for companies looking to incorporate a reasonably priced, fully integrated, broadcast quality, commercial digital signage solution into their environment

MEDIA FX enables a lifelike full HDMI broadcast experience at 720p resolution.

With MEDIA FX, the only requirement is the player itself, and an off-the-shelf LCD screen, eliminating the need for a media PC, software and other expensive peripherals.

Without complex operating systems to fail or moving parts, such as a hard drive to crash, most traditional failure points are eliminated, making maintenance a breeze!

MEDIA FX comes with a standard 1 year warranty and full online and phone support, making MEDIA FX the best digital signage solution value on the market.

Combined with the online SignPassage content management and delivery system, companies can easily deploy a compact, lightweight, advertising system at a fraction of the cost of traditional digital signage.
